FULL PRODUCT CATALOG

QUICK NOTES ABOUT THIS CATALOG

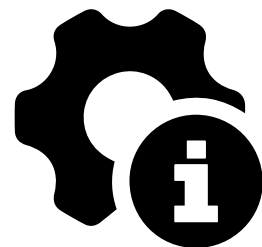

Each product has a “Size” section that looks something like this: **Size: 4 x 6 x 8 .**

The three numbers represent height, width, and depth, respectively.

Height is the vertical dimension of the front panel.

Width is the horizontal dimension of the front panel.

Depth is the dimension from the front panel to the back panel.

Please note, product availability may vary by warehouse location.

FIRECRACKERS

FCBC101 / FCBC101R (ROLL)

BLACK CAT FIRECRACKERS

Each batch produced is checked for loudness, dud rate, string consistency, labeling and packaging. We've seen many grades of firecrackers being produced and we'll only make the best for Black Cat.

The highest quality standards in our industry are created by 1) using the maximum alloy materials allowed, 2) using labor intensive methods to provide tighter wrapped and thicker tubes, creating bigger bangs, and 3) even though the generally accepted dud rate for generic Chinese firecrackers is 50%, our own Black Cat criteria only allows for a 5% failure rate.

PACKING:	12/80/16	8/20/100	8/10/200	8/5/400	ROLL	32/500	8/2000	2/8000	
	24/40/16	8/40/50	160/100	10/5/300	PACKING:	16/1000	4/4000	1/10,000	1/16,000

FCBC00100A
